

Press release – 21st December 2010

CornerTape recognition for hospital operating theatres

CornerTape, the new and proven sealant-taming product system, has been suggested for use in the refurbishment of operating theatres as a brand new, controlled and hygienic method of preparing, applying and finishing silicone and sealants for impeccable, longer lasting, higher performing sealant joints.

Lester Stuart, a consultant inspector for a major independent centre of scientific excellence in safety, health and hygiene, approached CornerTape at a recent trade show and recognised the opportunity to take hospital sealant application and hygiene to new levels. Lester said: "When I saw the CornerTape System, the advantages of using it in hospitals were obvious as it offers a no mess, no mistakes method of sealant preparation and application with a significant consideration for infection control."

CornerTape has initially been suggested for use in the refurbishment of operating theatres, which takes place on a regular basis to maintain levels of hygiene.

The CornerTape System contains silicone remover tools, CornerTape Preparation Wipes – alcohol-based to thoroughly degrease and kill bacteria ensuring sterile surfaces and absolute adhesion of new sealant – and rolls of CornerTape in a choice of sizes for a perfectly parallel and straight clean-edge finish with no smudges, edges or ridges.

Andy Toyne, sales director for CornerTape in the UK, said: "We are delighted to have met Lester. He has an incredible attention for detail and it's really fantastic that he instantly recognised the many benefits of using CornerTape and our other products in hospitals. Using our system will save maintenance teams both time and sealant and every single member, regardless of their skill in using a sealant gun, can be confident in achieving consistent results to the highest possible standard. Joints created using the CornerTape System are stronger, more durable and more reliable than the traditional imprecise and messy methods, and we're pleased that the product has received recognition for its excellent qualities."

CornerTape products are available throughout the UK from all branches of Wolseley's Plumb Center and very soon, selected stores of The Ironmongery Center and Build Center, as well as a growing number of independent trade and retail outlets.

For further information or to discuss stocking or using CornerTape products, contact CTA Products on 01754 896990 or email andy@cornertape.co. A video demonstration can be found online, at YouTube and at www.cornertape.co.

Users in the UK, comment on CornerTape:

11th May 2010

"I used the tape yesterday, and it was the best silicone run I've ever done! Everyone noticed – it was such a tidy job, no-one could say anything but praise for the tape and now they all want some! Of all the tools and accessories I've tried over the years, nothing beats CornerTape for actually doing what it's described to do. The company I work with is interested in using the product too."

Neil Walters, kitchen fitter in Pembrokeshire, Wales

May 2010

"The ideal opportunity came to try my CornerTape in the refurbishment of a new head office reception area involving some 60sqm of Clip-n-Fit pre-grouted porcelain floor tiles. One of my wood floor installers, who also specialises in the fitting of Clip-n-Fit tiles and is particularly proficient with the skeleton gun, used the CornerTape and his reaction was genuinely enthusiastic. He said the job, particularly on the long runs, was so much easier, quicker and the result was more even ie. better than can be achieved generally by the 'wet finger' method used by so many. Texfield will henceforth be using CornerTape on all types of flooring."

Malcolm Wingrove, Texfield Services Ltd, flooring contractors, London

June 2010

"We use CornerTape on all of our buildings, to create a perfectly-finished seal in the internal corners. Our buildings are used as offices, studios, pool and spa rooms, media, hobbies and day rooms, every one finished to the highest achievable standard. The outside is lovely Cedar wood but we were struggling when it came to establishing an equally professional finish in the internal corners of our buildings. We have been using CornerTape for about a year now – it keeps sealant where it's supposed to be and leaves a perfectly straight fine line with a top quality finish. Everyone notices and asks how we do it!

Paul Raven, Inhus garden buildings, Suffolk (www.inhus.com)
