

Press release – 8th February 2011

New for 2011! CornerTape SiliconePro Kitchen & Bathroom Sealant - With unique Anti-Drip Valve and Pre-Cut Nozzle System

STG Products Ltd, exclusive distributor of the award-winning, sealant-taming CornerTape productsystem in the UK, is delighted to introduce a brand new product to its range of sealant accessories.

The brand new CornerTape SiliconePro Kitchen & Bathroom Sealant, which was revealed at the Totally DIY show at the NEC this week, incorporates the World's first Anti-Drip Valve and Pre-Cut Nozzle System and is available in 7 different colours from March 2011. The company will also be releasing a number of other sealant products over the coming months, which will revolutionise the sealant market.

All the new sealants are and will be Anti-Mould and include the patented, unique Anti-Drip Valve and Pre-Cut Nozzle System for easy use, to prevent waste and save even more mess.

The Anti-Drip Valve is conveniently positioned at the front of the tube, close to the front hand so it cannot be forgotten and is easy to use - one simple turn of the valve immediately cuts off the flow of sealant, preventing the traditionally inevitable overspill.

The Pre-Cut Nozzle System comes in four sections, each of which unscrews to reveal the next, and a lid. Each nozzle is cut at an angle of 45° and corresponds to the various sizes of CornerTape for beads of sealant 2.5mm, 4mm, 6mm and 8mm in size. The CornerTape patented Pre-Cut Nozzle System can be used time and time again, the cured sealant easily cleared by simply unscrewing each nozzle and taking the old cured sealant out – no more prodding and poking the hard sealant from the nozzle and no need to purchase new nozzles.

Andy Toyne, Sales Director of STG Products Ltd, said: "We realise there are many sealants on the market, and we're launching products into an already overcrowded category but I've got to say that the feedback so far leads us to believe we're onto a real winner and have such a significant point of difference to others products that we know both trade and DIY customers will love our sealants. So, not only do we have a sealant range which is at least on a par and in many cases superior to the

current offering, we also have the World's first Anti-Drip Valve and Pre-Cut Nozzle System. I'm sure that professionals and DIY'ers will all see the benefits."

CornerTape SiliconePro sealant will be available from March 2011, in a choice of colours – white, black, grey, light grey, dark grey, cream and clear, for perfect coordination in every sealant job.

Users in the UK, comment on CornerTape:

11th May 2010

"I used the tape yesterday, and it was the best silicone run I've ever done! Everyone noticed – it was such a tidy job, no-one could say anything but praise for the tape and now they all want some! Of all the tools and accessories I've tried over the years, nothing beats CornerTape for actually doing what it's described to do. The company I work with is interested in using the product too."

Neil Walters, kitchen fitter in Pembrokeshire, Wales

May 2010

"The ideal opportunity came to try my CornerTape in the refurbishment of a new head office reception area involving some 60sqm of Clip-n-Fit pre-grouted porcelain floor tiles. One of my wood floor installers, who also specialises in the fitting of Clip-n-Fit tiles and is particularly proficient with the skeleton gun, used the CornerTape and his reaction was genuinely enthusiastic. He said the job, particularly on the long runs, was so much easier, quicker and the result was more even ie. better than can be achieved generally by the 'wet finger' method used by so many. Texfield will henceforth be using CornerTape on all types of flooring."

Malcolm Wingrove, Texfield Services Ltd, flooring contractors, London

June 2010

"We use CornerTape on all of our buildings, to create a perfectly-finished seal in the internal corners. Our buildings are used as offices, studios, pool and spa rooms, media, hobbies and day rooms, every one finished to the highest achievable standard. The outside is lovely Cedar wood but we were struggling when it came to establishing an equally professional finish in the internal corners of our buildings. We have been using CornerTape for about a year now – it keeps sealant where it's supposed to be and leaves a perfectly straight fine line with a top quality finish. Everyone notices and asks how we do it!

Paul Raven, Inhus garden buildings, Suffolk (www.inhus.com)
