Whole new world of design possibilities with Dune, now at Tile Depot

- Special tiles for special projects

Tile Depot has opened up a whole new world of design possibilities with the introduction of a sensational, inimitable collection of unique, exquisite tiles by Dune.

The invigorating collection is highly innovative, using natural and daring raw materials in an exciting spectrum of colour, shape, size, texture and finish to create aesthetical sensations and limitless design scope for modern homes, boutique businesses, interior designers and architects.

At the pinnacle of modern design are Amitista and Agata, from the Litoterapia range of [wall tiles in authentic semi-precious stones](#). The natural energy emitted by minerals was used by ancient civilisations to balance and harmonise the mind and body, today it is used in alternative therapy and now the beautiful stones and their beneficial properties are available for interiors from Tile Depot, in shapely sheets of 26x26cm.

Amitista is made up of transparent and translucent stones of grey to purple in amethyst, one of the most valuable gem stones, which brings energy, equilibrium and spirituality. Linked to the seventh chakra, it purifies the body and mind, enhances understanding and persuasion, acts as a sedative for pain and anguish and has an affinity with the signs of Aries, Cancer, Leo, Virgo, Capricorn, Aquarius, Pisces and Libra.

Agata contains opaque and translucent stones with a richness of colour from yellows to dark browns and reds. The many therapeutic benefits of Agate include the protection of the respiratory tract and throat; it carries benefits for the skin and stimulates the sense of hearing. Agate contributes to peace and equilibrium; is related to the brow, the solar plexus and the sacral chakras and has an affinity with Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Pisces and Aquarius.

From the stone range, Montblanc is a wonderful 33x27cm wall tile in stick mosaics of ice white stone with depth variation for a captivating appeal, and pebbles in various shapes and similar sizes in natural tones of brown and beige make up the orderly texture of Rio Onix.

Petroglyphe Bordeaux is part of the Petroglyphe range of sumptuously decorated stone tiles, derived using words to describe the graphic representations carved into the surface of rocks and stones by our prehistoric ancestors. The charming and luxurious Petroglyphe Bordeaux slate wall tile is 30x60cm in refined dark brown with a rich gold pattern.

The Vitra range features amazing fusions using a synthesis of warm fabrics, sophisticated metals and expressive wallpapers encased inside a tile of glass to protect and enhance its beauty. Pan de Oro is a 30x60cm Vitra tile with a gold foil-like appearance, Krypton is a spirited 28x28cm tile with a shattered glass appeal and Glass Mirror 28.6x30cm is made up of small stick mirror mosaics.

Iron Touch is a 30x30cm porcelain tile of mosaics with a silver metal effect using a selection of dots, stripes, brick and weave patterns to create various textures and sophisticated depth for contemporary rooms.

Amazonia Natura is from the trend creator's 'be natural' range. The 30.2x30.2cm mosaic tiles are made up of cut wood laid with the grain in an arrangement of horizontal and vertical lines, the natural variations in texture and tone creating light and shadow and enhancing the charming patterns of the wood.

Moon Shadow is an impactful and scintillating ceramic tile in 15x60cm of dark colour with a rain-like, lustrous and shimmering pattern.

From the Materia range, Planetarium is characterful and fun in 27.6x27.6cm tiles of glossy pebbles in black, white, gold, grey, metallic's and striking blues. Using plain, lustrous, intricately patterned, glass, stone and hammered effect tiles in a mosaic of one colour tone, Hermes glows in browns and bronze, Poseidon rouses calm in cool blues from silver to navy, Atenea is rich in sumptuous reds and Solomon is graceful in gold.
